Profile

Focused on accomplishing challenging development goals under strict deadlines. Analytical and resourceful problem-solver with disciplined approach and skill in producing clean, robust code.

Experience

FREELANCING, MIAMI, FL, 2021-PRESENT

KingTrader - This is a trading platform with full authentication. Users are able to buy and sell stocks, look at the news, price, news and company information comes from an API, they are also able to make comments or share trading ideas, as well as add the stocks to a watchlist.

BuyBack App - This is a React based web application where users are able to sell their phones to the admin, they will get a price based on things such as phone brand, carrier, storage, etc... Once the user submits the order the admin can see them in a private route, and accept or decline the offer.

Instagram Clone- The idea of this project is to clone Instagram's UI and get to use Firebase features. Users are able to create an account, authenticate, upload images with captions, make comments on other posts and see it in real time.

Package Tracker- In this application bell attendants and front desk agents are able to log packages. This application aims to increase efficiency and communication between front desk agents and bell attendants, making it easier to get packages delivered. (Not Finished)

BELL ATTENDANT, FOUR SEASONS, MIAMI FL – 2019-2021

Responded to guest concerns and requests and quickly handled issues.
Transferred suitcases, bags and other items from vehicles and main lobby to and from guest rooms.
Discussed guest issues with front desk manager to devise speedy resolutions.
